## Employment History

### Frontend UI Developer, EgenieNext Web Solution

May 2018 - Present

Johar Town

- Currently engaged in UI development projects with Netwrix.com and polycypak.com.
- Contributing to various products at Polycypak.com, including WordPress, React.js, Laravel, and CodeIgniter
- Implemented a custom template and bespoke post type within the Polycypak ecosystem, integrating UI designs crafted in Figma and Photoshop. Adhering closely to design specifications, I ensured a seamless transition from concept to execution, facilitating a cohesive and visually engaging user experience. This involved meticulous attention to detail and effective collaboration with design teams to accurately translate their vision into functional interfaces.
- Developed the UI for MurrieWatch using React.js and Material UI, ensuring a seamless and intuitive user experience.
- Designed customizable interfaces for multiple organizations, similar to Google Meet, leveraging React.js and Material UI for optimal performance and flexibility.
- Spearheaded the UI design for CirclePay, a comprehensive platform built on AngularJS, seamlessly integrating Bootstrap and Material UI for monitoring and co-browsing functionalities.
- Played a pivotal role in the UI development of projects like Keywords, implementing Angular and Bootstrap to meet project requirements efficiently.
- Contributed to the UI design of the WhiteMedia project, utilizing Angular and Bootstrap frameworks to create dynamic and visually appealing interfaces tailored to project specifications.
- Won Employee of year award for my outstanding and exceptional performance of 2022.
